	- The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1 and 4 are pending in this office action, claims 2, 3, and 5 are canceled.

2. Applicant's arguments, filed January 24, 2007, have been considered and are persuasive.

Claim Rejections

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. <u>Claims 1 and 4</u> are rejected under 35 U.S.C. 103(a) as being unpatentable over <u>Awadalla</u> (U.S. Patent Pub. No. 2002/0184494) in view of <u>Ishibashi</u> (U.S. Patent No. 6,321,654).

Art Unit: 2136

Regarding <u>claims 1 and 4</u>, <u>Awadalla</u> teaches a method/segmentedly encrypted document print job which preserves options for post-rendering analysis/processing of selected non-content components comprising:

- Identifying and individuating within such a job the content commands as distinguished from the non-content commands (fig. 1, ref. num 12 and paragraph 0031);
- As a sequence of said identifying and individuating, encrypting only data
 contained within the content commands (fig. 1, ref. num 10 and paragraph 0040).

Awadalla does not teach identifying and individuating, within such content commands, the content-field portions of those commands and encrypting only the content-field portions.

<u>Ishibashi</u> teaches **identifying and individuating, within such content commands, the content-field portions of those commands** (col. 5, lines 11-17)
encrypting only portions that effect rendering of data (fig. 2 and col. 5, lines 45-57).

It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to combine encrypting only the portions that control rendering, as taught by <u>Ishibashi</u>, with the method of <u>Awadalla</u>. It would have been obvious for such modifications because system can be simplified (and less costly) by only having to operate on a certain data, i.e., I-frames instead of P-frames and B-frames (see col. 5,

Application/Control Number: 10/674,329

Page 4

the content (P-frames and B-frames). Without the I-frames, the video would be

lines 58-64 of Ishibashi). Additionally, like PDL, I-frames control the layout of the rest of

unusable; similar to losing the content-field portions of content commands in PDL.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Brandon S. Hoffman whose telephone number is 571-

272-3863. The examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nasser G. Moazzami can be reached on 571-272-4195. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
